Introduction

I am a Software Engineer with 1.5 years of professional experience, holding a degree in Information Technology from VNU-HCM University of Information Technology. I have a strong foundation in full-stack development with a focus on delivering scalable, high-quality web applications.

Future Plans: I am seeking software engineering roles where I can deepen my expertise in system design and modern web technologies. In the next 10 years, I aim to become a Senior Engineer specializing in scalable system architecture and design systems.

Experience

Golden Owl Solution *Full-stack Intern, Software Engineer* *Dec 2024 – Present*

- Worked as a **Full-stack Developer** across multiple client projects, collaborating in cross-functional teams of 3–5 members.
- DISC** (tracnghiemtinhcach.vn) — Personality assessment platform. Diagnosed and resolved an AI flow bottleneck, reducing average response countdown time **from 10s to under 1s**, significantly improving user experience.
- Mercstone** — Web application for **eKYC** (electronic Know Your Customer). Built identity verification flows integrating document scanning and liveness detection APIs.
- Casapic** — Property showcase platform with **AI-enhanced image processing**. Implemented image upload pipelines and integrated AI-based image enhancement features for real estate listings.

Freelancer 2-4 members *Full-stack Developer* *May 2024 – Dec 2024*

- Implemented **secure user authentication** and built **RESTful APIs** for seamless communication between front-end and back-end systems.
- Integrated **payment processing system**, enabling secure transactions with third-party APIs like Stripe.
- Collaborated with a team of 2–4 developers, providing technical guidance and conducting code reviews to ensure high-quality standards.

Projects

Casapic | Nov 2025 - Feb 2026 | Full-stack engineering | 5 members casapic.com 🌐

- Multi-locale webapp and CMS blogs for showing property with AI processing, and enhancing images.
- Implement website with responsive in multi-screen reach 100% matching high-quality Figma design, with AI-tools; Investigate and high-performance Lighthouse score, and SEO; Improve UX at mirco-interaction level.
- Tech:** Nextjs, Tailwindcss, React-query, Zustand, Zod, Shadcn, Framer-motion, Sanity CMS, React-email, Next-auth, Nestjs, Resend, Google Gemini Ai, PostgreSQL (mikro-orm), Supabase Storage

Medcourtag | Sep 2025 | Frontend engineering | 5 members medcourtag.ch 🌐

- Multi-locale landing pages and CMS blogs for introducing provider of insurance solutions in Switzerland
- Implement website with responsive in multi-screen reach 100% matching high-quality Figma design, with AI-tools; Investigate and high-performance Lighthouse score, and SEO; Improve UX at mirco-interaction level.
- Tech:** Typescript, Nextjs, Next-intl, Tailwindcss, Zod, Shadcn, Sanity CMS, React-email

Skills

Frontend: Next.js, React, TypeScript, Javascript, TailwindCSS, Zustand, Zod, React-query, SWR, Axios.

Backend: NestJS, Express, MongoDB, MySQL.

Tools: Visual Studio Code, MongoDB Atlas, Cloudinary, Git.

Education

VNU-HCM University of Information Technology
Information Technology

Sep 2021 – May 2025

- **Graduated GPA:** 9.19/10.
- **Relevant Courses:** Software Engineering, Internet and Web Technologies, Search Engine Optimization, Web System Development.

Certifications & Achievements

Certifications:

- TOEIC Listening & Reading: **690/990**.
- TOEIC Speaking & Writing: **290/400**.

Achievements:

- Recognized as a **Promising Young Employee** at **Golden Owl Solutions**.
- Awarded the **Excellence Award** for **6 consecutive semesters**.
- Achieved the **Good Award** for **1 semester**.
- Received the **University's Academic Encouragement Scholarship** for **3 consecutive semesters**.
